

# WATER RECLAMATION SYSTEM

## THE COMPLETE CAR WASH SYSTEM

“MEET REGULATIONS - FILTER YOUR WATER, CONTROL ODOR AND RE-USE IT.”

### BENEFITS

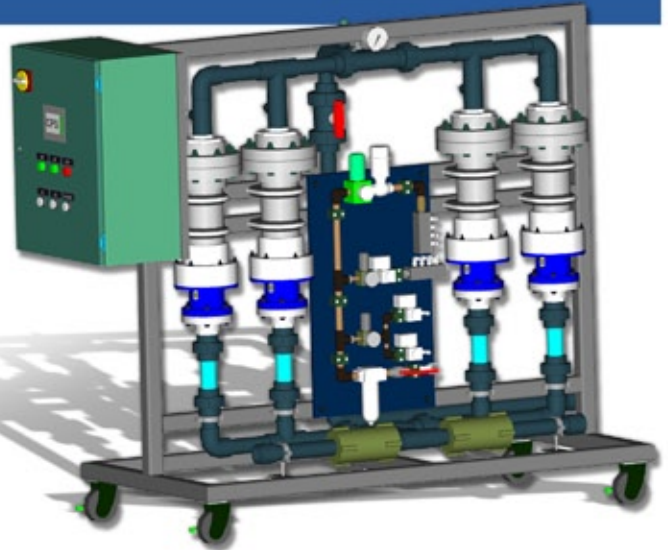

100% return on investment usually within one year

Proven technology - Guaranteed filter life of more than 7 years

Re-use all of your collected water

Low maintenance - No consumables or additives

Low energy requirements - Less than \$5/month

### FEATURES

Advanced filter technology with over pressure sensor

Small particle size removal - Below 5 micron

Fully automated including unique self-cleaning

Full system monitoring and automatic bypass to fresh water in case of system default

Stainless, Brass and PVC construction

Optional add on equipment

UL approved controls and system warranty

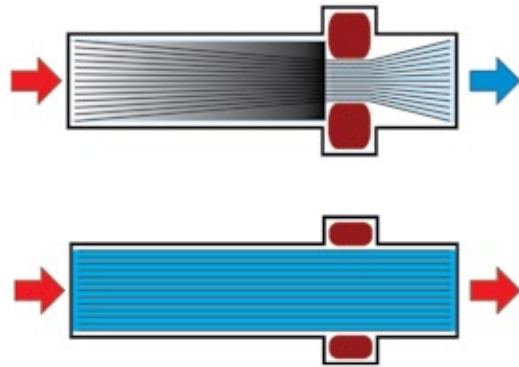

**Control & Power Systems, Inc.**

17 SPIELMAN ROAD, FAIRFIELD, NJ 07004 • 973-575-3300 PHONE • 973-575-5300 FAX • WWW.C-P-S.COM

## SIMPLE TECHNOLOGY

The filters use a proprietary technology whereby particulate is trapped in a constricted fiber bundle.

Using air pressure during filtration the bundles are compressed to prevent the passage of small particles along its length. To flush the filters the air pressure is released to allow the particles to be purged from the system.

## OPTIONAL COMPONENTS

Chlorinator

pH Control

Odor Control

Pressurized Water Storage Tank

Remote Alarming

Expandable Capability

## OUR COMPANY

Control & Power Systems, Inc. offers car wash system automation and control panel design and fabrication as well as installation and service.

Additionally, CPS offers consultation and customer specific CAD (Computer Aided Design) service for your car wash.
